

# **INSPECTION REQUIREMENTS FOR ROOFING**

Due to the nature of the process of roofing and the fact that the building inspector cannot be on your job to inspect the application of materials during the process, pictures will need to be taken and submitted by texting them to the Building Inspector for **approval before proceeding with the job.** Failure to do so can result in removal of shingles for inspection purposes.

Pictures will be needed at the following times:

1. Pictures of the roof deck after removal of the old shingles.
2. Pictures of any sheathing replaced.
3. Pictures of the ice and water shield.
4. Valleys with ice and water shield.

**Text these pictures before installing shingles, not at the completion of the job!**

5. Flashings around chimneys and alongside walls.
6. Ridge vent openings.
7. Completed project.

**Text the pictures to the Building Inspector at 906-364-1277 at any time for approval.**
